Dear Folks at DeBell Windows:

We had you install replacement windows throughout our home several years ago, and we have been enjoying them so much we just had to write and say thanks! Following are pictures of what the world looks like from the inside of our beautiful windows. As you can see, we couldn't settle on one just one grid--diamond-pane, Colonial, or plain ones--so we put in some of each. Not only was that a fun part of getting windows from DeBell's but we love them all!

Here's the living room with diamond-paned windows. It's our dog's favorite place to sleep in the sun or check out any neighborhood dogs and quail passing by! One of my favorite aspects is that we can leave the blinds pulled up all day long to let the light in and we'll never have to worry about fading the carpet or furniture!

In the kitchen we have a great garden window over the sink. It's as good as a skylight without the problem of leaks or heavy snow loads. And what a wonderful place to start some bulbs growing!

*The dining room has windows on two walls for lots of bright sunlight on gloomy winter days. They're really easy to clean, even from the inside, so we can keep the sunlight coming in! They are also secure and easy to open for cross-ventilation in the summer.*

*Here's the view of our patio from the family room. We leave the drapes wide open, even when it's snowy outside, since these sliders are so incredibly well insulated that they don't lose precious heat. Another bonus for me: the Colonial style grids make these patio doors look just like coveted French doors!*

*All in all, we could not be happier with our replacement windows. We've been telling friends and neighbors about how much we like them for several years now, but please feel free to share this letter with anyone else who might need a hearty and unqualified recommendation.*

*Thank you again for our beautiful DeBell windows!*

*Sincerely,*

*Bill and Ann Sims*
